MEGATREND designs a smart space that harmonizes the business environment with work efficiency. The space, where color, design and function are all combined, creates synergistic effects by harmonizing people and technology. Furthermore, this synergy increases the energy level to improve business competitiveness. MEGATREND is the best component system which the simple modules allow the flexibility to change and compose layouts according to the change of work and organization. Also, it can maximize work efficiency by utilizing all space as working space within the parameters, left to right and all around.

Furniture and accessories have been developed and renovated for better efficiency together with the birth and disappearance of new business and organizations. Business success was the result of these competitive changes of the business environment.

You can feel the true value of the UV hi-glossy in the UV hi-glossy Furniture System with their crystal-like gloss and clean and clear color images. You can feel the satisfaction of changes by merely looking at the exterior designs of the Hi-glossy System Furniture.

It is designed to contain a business information system, with very functional models that make union and separation, expansion and reduction possible, to change space according to users' personalities and work styles.

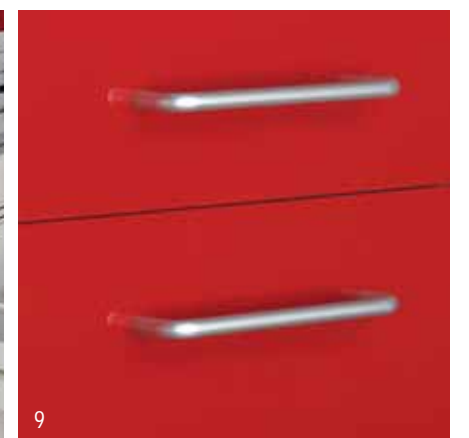

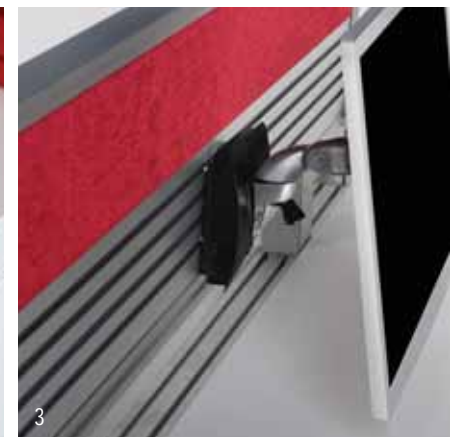

As the world moves forward, people and business are moving back small office. This is only possible because today's small space is as technically sophisticated as any place. What kind of furniture would suit such a place?

The offices of today's top business leaders are changing in this age of globalization. And such revolutionary changes need to begin in the offices of top management, which are the source of a company's strength and energy.

Furniture and accessories have been developed and renovated for better efficiency together with the birth and disappearance of new business and organizations. Business success was the result of these competitive changes of the business environment.

The offices of today's top business leaders are changing in this age of globalization. And such revolutionary changes need to begin in the offices of top management, which are the source of a company's strength and energy.

Today's business leaders need integrated management systems that use office space efficiently while also enhancing productivity. The color and design of such systems must appeal to international tastes while also reflecting the seriousness of a business environment. The systems must also be able to effectively handle the demands of the revolutionary changes in today's multimedia age.
